

Save money the next time you need a prescription drug by asking your doctor or pharmacist for the generic version of the drug.

Generic drugs are:

- Manufactured under the same strict standards set by the FDA for all drugs
- Sold at substantial discounts
- Chemically identical in strength and dosage form

Learn more about why generic drugs are the smart, safe, effective, low-cost choice by visiting www.bcbsks.com/resourceblue and browsing the prescription drug section.
