## Policy Memo No. 1 SECTION XI. Medical Records

- **Page 12:** Added language regarding cloning of medical records.
  - A. Form of documentation in medical records – Documentation in the medical record must accurately reflect the health care services rendered to the patient and is an integral part of the reimbursement, audit, and review processes.
    - 1. Documentation of medical services – Medical records are expected to contain all the elements required in order to file and substantiate a claim for the services as well as the appropriate level of care, i.e., evaluation and management service (see Policy Memo No. 2). Each diagnosis submitted on the claim must be supported by the documentation in the patient's medical record. The contracting provider agrees to submit claims only when appropriate documentation supporting said claims is present in the medical record(s) which shall be made available for audit and review at no charge.

Letters/checklists are not acceptable as documentation of medical necessity and do not replace what should be in the complete medical record. Abbreviations must be those that are generally accepted by your peers and clearly translated to be understandable to the reviewer.

2. **Cloned Medical Record Documentation – BCBSKS expects providers to submit documentation specific to the patient and specific to the individual encounter. Documentation should support the individualized care each BCBSKS member received.**

**Documentation identified as cloned, copied and pasted, pulled forward, or inserted via template without identifiable and appropriate updates specific to the current visit will not be considered for the purposes of determining services provided for that visit.**
