

Dear Providers,

Thank you for being valued members of the Blue Cross and Blue Shield of Kansas (BCBSKS) provider network. Your commitment to delivering high-quality care to our members is essential for the health of Kansans.

Our goal is to maintain the quality of our provider network while enhancing experiences, improving health and managing costs effectively for everyone. Enclosed are the updates to our policy memos and statewide reimbursement rates for the 2027 contract period.

As part of our commitment to you, our providers, we are pleased to offer the following improved and streamlined services in 2027:

- Simplifying the Quality-Based Reimbursement Program (QBRP) to better align quality incentives with our future value-based care strategy.
- Assigning one provider relations representative to make it easier to get the support and services you need.
- Continuing to improve the websites, policy memos and provider manuals.
- Expanding our lines of business through TriWest and Healthy Blue, creating additional opportunities to serve more members and strengthen our provider network.

Your partnership is vital to us as the state's largest and only local health plan. Please review your statewide reimbursement rates via your [Availity login](#) and note the contracting deadline is Sept. 3, 2026. **No action is needed if you plan to continue in the BCBSKS network.**

We value your partnership and commitment to excellence. For more than 80 years, we have supported BCBSKS members with a robust provider network, which includes over 95% of the eligible hospitals and providers in Kansas. Thank you for being part of our network and our partner in health.

Sincerely,

Janne Adams
Director, Provider Relations
